

of treatments. In addition, the Administration on Aging is working with States to improve home and community-based services for people with dementia and their families.

As we observe National Alzheimer's Disease Awareness Month, we recognize our citizens who are living with this disease and extend our gratitude to those who provide vital care and support. We also specially recognize the public and private scientists, researchers, nurses, and health care providers who are dedicated to finding new and better ways to help patients and ultimately find a cure for Alzheimer's disease. Their efforts bring comfort to many and offer hope for the future.

Now, Therefore, I, George W. Bush, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 2004 as National Alzheimer's Disease Awareness Month. I call upon the people of the United States to observe this month with appropriate programs and activities.

In Witness Whereof, I have hereunto set my hand this fourth day of November, in the year of our Lord two thousand four, and of the Independence of the United States of America the two hundred and twenty-ninth.

George W. Bush

Proclamation 7840—National American Indian Heritage Month, 2004

November 4, 2004

By the President of the United States of America

A Proclamation

As the first people to call our country home, American Indians and Alaska Natives have a noble history in this land and have long shaped our Nation. During National American Indian Heritage Month, we celebrate our commitment to respect and pre-

serve the rich Native American traditions and cultures.

The enduring experiences of tribal communities are a cherished part of our national story. In September, I was proud to meet with tribal leaders and celebrate the opening of the Smithsonian Institution's National Museum of the American Indian on the National Mall in Washington, D.C. This new facility stands as a powerful symbol of the pride and vitality of our Native Peoples. The museum showcases masterworks of great cultural, historical, and spiritual significance. Through exhibits documenting past and present achievements and hopes for the future, it will introduce generations of visitors to the strong and living traditions of Native Americans. As a center for scholarship and learning, the National Museum of the American Indian will also advance understanding of the diversity that makes our Nation great.

My Administration is committed to helping Native Americans as they build on their proud legacy. With the funding of my 2005 budget, we will have provided the Bureau of Indian Affairs with more than \$1.1 billion for school construction and repairs during the past 4 years. To improve education for American Indian and Alaska Native children, I signed an executive order establishing an Interagency Working Group to help students meet the standards set by the No Child Left Behind Act of 2001 in a manner that is consistent with tribal traditions, languages, and cultures. By setting standards for academic achievement and cultural learning, Americans in all communities can help their children realize a brighter future. I also signed an executive memorandum to all Federal agencies affirming the Federal Government's continuing commitment to recognize tribal sovereignty and self-determination. As they have in the past, tribal governments will maintain jurisdiction over their lands, systems of self-governance, and government-to-government relationships with the United States.

Now, Therefore, I, George W. Bush, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 2004 as National American Indian Heritage

Month. I encourage all Americans to commemorate this month with appropriate programs and activities and to learn more about the rich heritage of American Indians and Alaska Natives.

In Witness Whereof, I have hereunto set my hand this fourth day of November, in the year of our Lord two thousand four, and of the Independence of the United States of America the two hundred and twenty-ninth.

George W. Bush

Proclamation 7841—National Diabetes Month, 2004

November 4, 2004

By the President of the United States of America

A Proclamation

More than 18 million Americans are estimated to have diabetes. Diabetes is the leading cause of new blindness, end-stage kidney disease, and nontraumatic amputations. It can also double a person's risk of heart attack and stroke and can cause nervous system damage and premature death. During National Diabetes Month, we seek to raise awareness of the impact of diabetes on our citizens, and we recognize those committed to improving the treatment and prevention of this chronic disease.

Approximately one million Americans have been diagnosed with type 1 diabetes, once known as juvenile diabetes. It develops from autoimmune, genetic, and environmental influences, most often striking children, adolescents, and young adults. By developing the disease so young, people with type 1 diabetes have a greater risk for serious complications. Type 2 diabetes affects approximately 17 million Americans, and is most common in people over 40 who are overweight, inactive, or have a family history of this disease. While people of all backgrounds are affected, type 2 diabetes disproportionately strikes African Americans, Hispanic Americans, Asian

Americans, and Native Americans. The number of Americans with type 2 diabetes has grown dramatically, and many more Americans are at high risk for developing it.

My Administration is committed to funding diabetes research. This year, the National Institutes of Health dedicated \$993 million for diabetes research, and I have requested more than \$1 billion for 2005, a 49 percent increase since 2001.

We are also working to raise awareness of the risk factors associated with diabetes. According to clinical research, people at risk for type 2 diabetes can reduce their risk by approximately 58 percent if they lose a modest amount of weight and stay physically active. Those who already live with diabetes can greatly reduce their risk for heart disease and stroke by controlling their blood sugar, blood pressure, and cholesterol.

Now, Therefore, I, George W. Bush, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 2004 as National Diabetes Month. I call upon all Americans to observe this month with appropriate programs and activities.

In Witness Whereof, I have hereunto set my hand this fourth day of November, in the year of our Lord two thousand four, and of the Independence of the United States of America the two hundred and twenty-ninth.

Proclamation 7842—National Family Caregivers Month, 2004

November 4, 2004

By the President of the United States of America

A Proclamation

Every day, family caregivers across our Nation are caring for loved ones who are aging, chronically ill, or disabled. Through their selfless actions, they bring comfort to those
